Engineering

ABOUT THE STUDENT

Candidate Profile

Roll Number

2410030839

Institute

IILM University, Greater Noida, U.P.

Programme

B.TechCSE, Batch 2024–2028

Internship Domain

Web Development

Duration

4 Weeks | August

ABOUT THE
PROGRAM

TRL FutureX Web Development Internship

TRL FutureX provides practical training and internship opportunities focused on developing industry-relevant technical skills. The Web Development Internship is designed to provide hands-on experience in building modern websites and interactive web applications through structured learning and project-based tasks. During the internship, the focus was on HTML, CSS, JavaScript, responsive web design, frontend development, and practical website implementation.

Practical Thinking
Hands-on Web Development

Project Based
*Real-world Web
Projects*

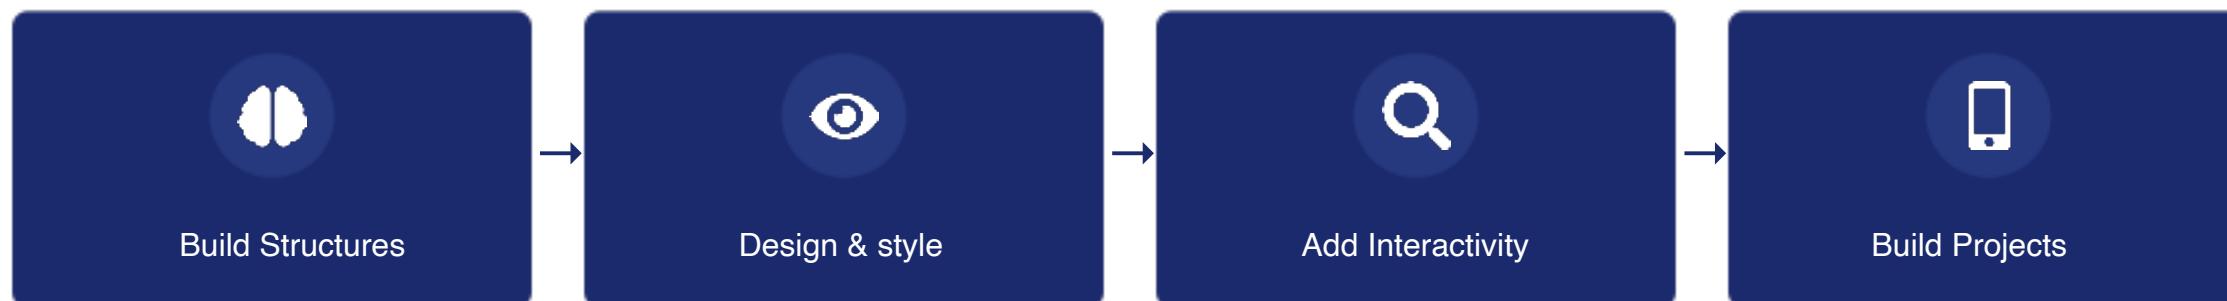

Web Technologies
HTML . CSS . JavaScript

Bridging Theory and Applied Computer Vision

Although students learn programming and web development concepts through coursework, they often have limited opportunities to apply these concepts through structured, hands-on projects. Understanding HTML, CSS, and JavaScript theoretically is different from actually designing responsive websites and developing interactive web applications.

This internship addressed that gap —practically learning the full TensorFlow-based workflow:

PROJECT OBJECTIVES

What the Internship Set Out to Achieve

HTML & Web Structure

Learn to create structured webpages using headings, forms, links, images, and other HTML elements.

CSS & Web Design

Learn CSS styling, layouts, spacing, typography, and visual design for modern websites.

Responsive Design

Develop webpages that adapt effectively to different screen sizes, including desktops, tablets, and mobile devices.

JavaScript Development

Apply HTML, CSS, and JavaScript concepts through projects such as the **Student Registration Page** and **To-Do List Application**.

Project Development

Apply HTML, CSS, and JavaScript concepts through projects such as the **Student Registration Page** and **To-Do List Application**.

Final Project

Combine the skills learned during the internship to create the **Smart Restaurant Booking Website**.

The Toolkit Behind the Internship

HTML5

Creating structured
webpages and forms

CSS3

Designing layouts,
colors, typography, and
components

JavaScript

Adding dynamic
functionality and user
interactions

Responsive design

Creating layouts for
desktop, tablet, and
mobile

DOM Manipulation

Modifying webpage
elements using JavaScript

CSS Flexbox

Creating flexible and
organized page layouts

HTML Forms

Collecting and handling
information through
formsVisual search
integration

Browser DevTools

Identifying and
fixing webpage
issues

From Web Structure to Interactive Application

Structure
Layer

Creates the basic structure of webpages, forms, navigation, and content.

Styling
Layer

Controls layout, typography, colors, spacing, and visual appearance.

Responsive
Layer

Adapts the website layout to desktops, tablets, and mobile devices.

Interaction
Layer

adds dynamic functionality, event handling, and user interactions.

DOM
Layer

Allows JavaScript to dynamically update webpage content and elements.

Application
Layer

Combines HTML, CSS, and JavaScript into functional projects and websites.

The 4-Week Learning Journey

1 WEEK

HTML & Web Foundations

Build a **Student Registration Webpage** using HTML forms, input fields, labels, buttons.

2 WEEK

CSS & Responsive Design

Develop a **Responsive Restaurant Website Homepage** using CSS layouts, styling, Flexbox, and responsive design techniques.

3 WEEK JavaScript & Interactivity

Create a **To-Do List Web Application** using JavaScript, event handling, DOM manipulation, and dynamic task management.

4 WEEK Final Web Project

Develop the **Smart Restaurant Booking Website** by integrating HTML, CSS, JavaScript, responsive design, and interactive components.

EXPECTED
OUTCOMES

Skills & Capabilities Gained

Ability to create structured webpages using HTML5 and develop forms for collecting user information.

Practical understanding of CSS3 and responsive web design for creating attractive and mobile-friendly layouts.

Hands-on experience with JavaScript for adding interactive features and handling user actions.

Ability to use DOM manipulation and event handling to create dynamic web applications.

Experience in developing practical web projects, including a Student Registration Page, Restaurant Homepage, and To-Do List Application.

Ability to integrate HTML, CSS, and JavaScript to develop a complete **Smart Restaurant Booking Website**.
